

Press Release – 22nd June 2009

LONDON, United Kingdom: Crew Gold Corporation ("Crew" or "the Company") (TSX: CRU) (OSE: CRU) today announces:-

Revised Production Guidance for LEFA for 2009

The Company has adjusted its production guidance for 2009 at its LEFA gold mine to a range of 220,000 to 240,000 ounces from its previously announced estimate of 290,000 ounces. The lower production estimates are due to previously announced plant equipment failures (primarily SAG mill 02) during the first six months of the year and longer than expected time to refurbish the mining fleet. While the Company previously believed that the anticipated shortfall from the first six months of production could be recovered by an increase in grade for the last six months, it has become apparent that the mobile mining fleet will not be able to match the planned production rate until the refurbishment program is complete. Operation of the mining fleet was taken over by the Company in September of 2008 and since that time the repair and maintenance of the fleet to bring it back to OEM standards has been ongoing. The restricted cash flow of the Company has not permitted it to accelerate the repair and maintenance process. It is currently expected that the mining and processing capacity of the operation will be matched by the end of 2009 such that the planned rates of production will be achieved in 2010.

William LeClair
Interim CEO

Safe Harbour Statement

Certain statements contained herein that are not statements of historical fact, may constitute forward-looking statements and are made pursuant to applicable and relevant national legislation (including the Safe-Harbour provisions of the United States Private Securities Litigation Reform Act of 1995) in countries where Crew is conducting business and/or investor relations. Forward-looking statements, include, but are not limited to those with respect to (1) the price of gold, (2) the estimation of mineral reserves and resources, (3) the realization of mineral reserves estimates, (4) the timing and amount of estimated future success of exploration activities, (5) the timing and amount of production estimates, (6) targeted production cash costs and forecasted cash reserves, (7) Crews hedging practices, (8) currency fluctuations, (9) requirements for additional capital, (10) government regulation of mining operations, (11) environmental risk, (12) title disputes or claims limitations on insurance coverage, (13) the timing and possible outcome of pending litigation, (14) the timing and terms of Crews proposed rights offering (15) expected cost reductions, and (16) the expected future capacity and success of the LEFA mine and its expansion potential. Often, but not always, forward-looking statements can be identified by the use of words such as plans, expects, does not expect, is expected, targets, budget, estimates, forecasts, intends, anticipates or does not anticipate, or believes, or equivalents or variation, including negative variation, of such words and phrases, or state that certain actions, events or results, may, could, would, might or will be taken, occur or be achieved.

Forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause the actual results of the Company to be materially different from the historical results or from any future results expressed or implied by such forward-looking statements. Such risks and uncertainties include, among others, (1) the actual results of current exploration activities, (2) conclusions of economic evaluations, (3) changes in project parameters as plans continue to be refined, (4) possible variations in grade and ore densities or recovery rates, (5) failure of plant, equipment or processes to operate as anticipated, (6) accidents, labour disputes and other risks of the mining industry, (7) delays in obtaining government approvals or financing or in completion of development or construction activities, and (8) risks and uncertainties existing in world capital markets generally. Although Crew has attempted to identify important factors that could cause actual events or results to differ from those described in forward-looking statements contained herein, there can be no assurance that the forward-looking statements will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements.

The material factors and assumptions used to develop forward-looking statements which may be incorrect, include, but are not limited to, (1) there being no significant disruptions affecting operations, whether due to labour disruptions, supply disruptions, damage to equipment or otherwise, (2) continued development, operation and production at LEFA and Maco consistent with our current expectations, (3) foreign exchange rates among the currencies the Crew does business in being approximately consistent with current levels, (4) certain price assumptions for gold, (5) prices for electricity, fuel oil and other key supplies remaining consistent with current levels, (6) production forecasts meeting expectations, (7) the accuracy of our current mineral reserve and mineral resource estimates, and (8) materials and labour costs increasing on a basis consistent with Crews expectations.

Except as may be required by applicable law or stock exchange regulation, the Company undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after the date of this document or to reflect the occurrence of unanticipated events. Accordingly, readers should not place undue reliance on forward-looking statements.

Cautionary Note to US investors The United States Securities and Exchange Commission permits US mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We use certain terms in this document, such as measured, indicated, and inferred resources, which the SEC guidelines strictly prohibit US registered companies from including in their filings with the SEC. US Investors are urged to consider closely the disclosure from the SECs website at <http://www.sec.gov/edgar.shtml>.
